

Cleaning Station

Depending on whether your attendees will be having more than one drink, you may need to think about providing a cleaning station. You can either provide a cleaning station where people wash their own cups, or you can provide a cleaning service where people bring their cups to.

Implementation

- Think about where the cleaning station will go and how people will access the station
 - you will want a fluid line of traffic between people cleaning their cups and getting more drinks
- Think about public access to water
