

PARKING SERVICES TECHNOLOGY ROADMAP

2025

Single Mobile App

Guided by community feedback and Council direction, Parking Services reduces parking apps to one selecting PayByPhone after a thorough review.

Digital Permits

To improve accessibility, Parking Services launches a digital portal for purchasing garage permits.

Gated Solution

A new gated system provider is selected to ensure consistent access and payment models across all three parking garages. The Flash system is first installed at 842 Palm Street.

Citation & Permit Management Software

Parking services transitions to a new citation and permit management software solution to provide a better end-user experience.

On-Street Pay Stations

To improve the on-street parking experience Parking Services, downtown businesses and community members demo new on-street parking pay stations.

2024

Based on community and downtown business feedback, the SLO City Council approved a technology roadmap for Parking Services including the following goals:

- One parking app (down from three)
- More parking permits available
- Unified gated system for all garages
- Improved on-street parking pay stations
